Object Oriented Programming

PROJECTS

- Weather Website

Description - I developed a straightforward weather website project that employs HTML, CSS, and JavaScript. It actively retrieves weather data and promptly showcases it to users, ensuring they receive real-time weather updates.

Languages used - HTML | CSS | JS

- Book Store Management System

Description - I have created a Book Store Management System with comprehensive CRUD operations, enabling the users to add, read, edit, delete & store the book details through a seamless web interface.

Languages used - Springboot | Hibernate | MySQL
